For immediate release

HOUSTON, TX

April 23, 2015 - Peek Traffic is excited to announce the release of its new NEMA MMU2, the SG-1000 Malfunction Management Unit.

The SG-1000 exceeds both NEMA TS1-1989 and NEMA TS2-2003 including amendment 4 for functional, Flashing Yellow Arrow, and environmental requirements for an MMU.

The new MMU2 is built upon all the features of Peek's Double Diamond MMU, and offers an improved dynamic status display with OLED technology and adds new features, such as:

- Supports flashing yellow arrow
- Standard USB device support for log collection
- Optional Ethernet capabilities
